SUMMARY

•

Data analytics professional with hands-on experience in Microsoft Excel (advanced), Power BI, Tableau, SQL, and Python. Passionate about turning raw data into clear insights that drive decisions. Currently transitioning from operations into a full-time data analyst role, with a growing portfolio of healthcare and business intelligence projects.

•

TECHNICAL SKILLS

•

Analytics Tools: Microsoft Excel (Power Pivot, Power Query, Macros/VBA), Power BI, Tableau, SQL, Python

Data Skills: Data cleaning, validation, visualization, dashboard design, pivot tables, DAX, chart formatting

Other Tools: Microsoft Copilot (AI-assisted debugging for VBA macros), Git/GitHub, Databricks (Associate level)

•

PROJECTS

•

CMS Marketplace Quality + Federal IDR Outcomes (SQL + Python)

- Analyzed CMS Marketplace Quality PUF (PY2026, 4,302 plans) and Federal IDR Supplemental tables (2025 Q1-Q2)
- Dual-engine checked five human-confirmed keepers with NR exclusion discipline (never treat NR as 0)
- Key results: EPO leads overall stars after NR exclusion (3.24); IDR provider prevailing share 87.4% to 88.2% Q1 to Q2; Admin at least 1 star above Overall on 48.8% of dual-rated plans
- Skills: SQL, Python, healthcare public data, data quality definitions, reproducible proof

Nashville Housing Data Cleanup (SQL)

- Cleaned and standardized 56,000+ Nashville housing records using SQL
- Removed duplicates, parsed addresses, normalized categorical fields
- Skills: SQL, data cleaning, data standardization

Employee Survey Response Analysis (Power BI)

- Built interactive Power BI dashboard analyzing employee satisfaction across departments
- Identified key drivers of attrition using slicers and drill-through reports
- Skills: Power BI, DAX, data visualization, HR analytics

Airbnb NYC Listings Analysis (Tableau)

- Developed Tableau dashboard analyzing 20,000+ NYC Airbnb listings
- Visualized pricing trends by neighborhood, room type, and availability
- Skills: Tableau, geographic data, trend analysis

BMI Health Calculator (Python)

- Built Python script calculating BMI with weight/height inputs and health category output
- Skills: Python, user input handling, conditional logic

Bike Sales Dashboard (Excel)

- Created interactive Excel dashboard with pivot tables and slicers for bike sales data
- Segmented data by demographics, region, and commute distance
- Skills: Excel, pivot tables, data visualization, dashboard design

•

WORK EXPERIENCE

•

EMS|MC (Emergency Medical Services Medical Center)

Mailroom Specialist | Chicago, IL

- Processed and routed incoming/outgoing mail and packages across departments
- Managed check processing, tape operations, and data entry workflows using Excel macros
- Developed and maintained VBA macros to automate repetitive data entry tasks
- Utilized Microsoft Copilot to debug Visual Basic runtime errors during macro development

Walmart

Associate | Palatine, IL

- Provided customer service and maintained store operations
- Handled inventory management and product stocking

Goodwill

Associate | Palatine, IL

- Assisted customers and maintained merchandise displays
- Processed donations and managed sales floor organization

•

EDUCATION

•

Bachelor of Arts

Graduated 2022

Ongoing Learning:

- Maven Analytics — Data Analytics portfolio coursework
- Analyst Builder — SQL and Python certifications
- Databricks Generative AI Associate Certificate (2024)
- Databricks Certified Context Engineer Associate
